EDUCATION

New York University

New York City, NY

Bachelor of Arts in Computer Science & Data Science, Minor in Business Studies

Expected May 2026

- Relevant Coursework: Operating Systems, Computer Systems Organization, Data Structures, Discrete Mathematics, Linear Algebra, Algorithms, Web Design, Causal Inference, Probability/Statistics, Software Engineering, Database Management

PROFESSIONAL EXPERIENCE

Johnson & Johnson

New Jersey

Data Science Intern

May 2025 – Aug 2025

- Built automated data pipelines in Python to source 100+ acquisition targets, reducing manual research time by ~50%
- Architected self-updating workflow that replaced manual process, eliminating recurring toil for business development team
- Wrote 300+ lines of well-documented Python utilities for profiling startups/aggregating data, adopted by 4 team members
- Organized 3 networking and career development events for 20+ interns as a Tech Intern Co-op Council member

NYU Tisch

New York City, NY

Student Computer IT Technician

July 2024 – Dec 2024

- Resolved 20+ daily service requests for 200+ faculty, prioritizing tickets to maintain technology infrastructure uptime
- Managed 15+ daily service requests, prioritizing and resolving issues to ensure stability of key technology infrastructure

MLVentures

Remote

Marketing Intern

Jun 2023 – Aug 2023

- Developed 2 specific digital marketing strategies that leveraged analytics leading to a 32% increase in user engagement
- Analyzed performance and marketing data, producing actionable insights to refine marketing campaign strategies

SELECTED PROJECTS

Orbit – AI-powered Interview Preparation Assistant

Next.js, TypeScript, Python, AWS, GCP, DynamoDB, Docker, LiveKit, WebSockets, Gemini, RAG

- Architected full-stack, Dockerized microservices platform deployed to the cloud, totaling ~5,000 LOC across 24 commits
- Engineered real-time TTS voice pipeline using LiveKit and Google Cloud, achieving 2.83s average end-to-end latency
- Fine-tuned Gemini 2.5 model, improving accuracy and reducing average response length from 254 to 138 characters
- Built RAG system over DynamoDB with semantic search, reducing hallucinated code leakage from 17.5% (base) to 5.0%
- Implemented a backend WebSocket that streams candidate's code editor state to LLM, enabling dynamic code review

GES UCLA Hackathon – Marketing GenAI

3rd Place / 20+ teams — Python, PyTorch, scikit-learn, Pandas, NumPy

- Built a VAE model in PyTorch to predict ad click-through rates from a 30,000-row dataset, placing 3rd of 20+ teams
- Engineered data ingestion pipeline using Pandas for preprocessing, trained & evaluated models with Scikit-learn + PyTorch

LEADERSHIP AND EXTRACURRICULARS

Tech@NYU – TechTreks

New York City, NY

Product Manager – Spocial Cooking App

Oct 2024 – Dec 2024

- Built MVP collaborative cooking app in Next.js, TypeScript, and Tailwind, leading team of 4 from concept to live demo
- Defined feature requirements and built a sprint-based project roadmap, establishing clear ownership across a team of 4
- Designed frontend UI elements with Figma and developed MVP; then led live demo showcase to over 40 other students

NYU Asian Cultural Union

New York City, NY

Vice President

Sep 2023 – Present

- Directed 6+ school-wide events and 4 semiannual club retreats for NYU students, drawing 300+ participants per event
- Organized 12 promotional videos/graphics, ran marketing campaigns, lifting engagement by and event turnout by ~50%
- Cultivated 3 partnerships with local NYC vendors, securing consistent access to supplies and catering for events

SKILLS

Languages: Java, Python, C/C++, JavaScript, TypeScript, Swift/SwiftUI, HTML/CSS, SQL

Frameworks/Libraries: Scikit-learn, NumPy, Matplotlib, TensorFlow, Next.js, React, Node.js, Tailwind, PyTorch, Postgres

Infra & Tools: AWS, GCP, Docker, DynamoDB, MongoDB, Git, Github, REST APIs, WebSockets, LiveKit, Jupyter, Figma

Concepts: Distributed systems, Real-time pipelines, RAG, LLM fine-tuning, Software engineering, Backend, Frontend
